BÚTOR

Mission

Since my childhood I have been attracted to real solid wood furnitures. A work of a lifetime and with fanatical enthusiasm, I have built up the foundations of solid wood furniture manufacturing at the bottom of the Vértes mountains, in the embrace of nature. Furniture production is not a job for us, but a mission. Our family found its vocation in this lively environment, living its daily life and creating value for them, who choose solid wood furniture.

János Pfiffer

High quality solid wood furniture production has special „requirements“. It requires great experience and attention because wood has a soul it is a living material. Our dedicated staff put their feelings into it to shape our solid wood furniture.

They believe and confess that true solid wood furnitures is not manufactured in series, is not made of plastic, is not mass-produced products imitating wood, each piece is unique and unrepeatabe, with its own authentic history. Therein lies its charm, that's why its imitated by many, in many different ways.

As it began...

It was 30 years ago, that in the small garage of my parents' house, with my background as a mechanic I started to build my basic woodworking machines. Then, in one big leap we turned a dilapidated farm building into a log splitting sawmill...

... as we evolved

The year the company was founded. Purchasing two abandoned agricultural sites on credit.

Automotive supplier works for Suzuki, manufacturing small upholstered furniture parts.

The year of construction a sawmill and 50 m³ drying chamber. And in 2000 the assembly plant was built - on 1000 m².

Construction of a solid wood processing plant on 1600 m².

Then, 10 years later, the commissioning of the planer, contact grinder with a working width of 1600 mm.

Construction of a logistics hall on 1150 m², combining with existing buildings. Design of a 4000 m² contiguous production area - including an automatic packaging line.

Obtaining ISO 9001 quality assurance and ISO 14001 environmental management certificate.

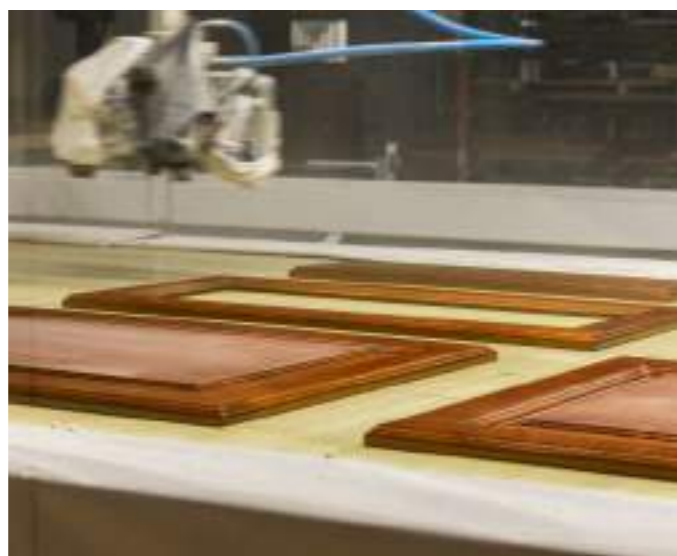

Then, 10 years later, the commissioning of the planer, contact grinder with a working width of 1600 mm.

As we prepare

From log cutting to the installation of finished furniture all in one place and all in one hand. Our quality charter: „no compromise“. We attach particular importance to meet the deadlines.

What we create

GUN CABINETS

What makes a gun cabinet special, what makes it different from the rest? What makes it more than a gun cabinet?

„Best or nothing“

Hunting lodges - Hunting furniture

Made of real wood, for real hunters looking for real experiences. Custom-made furniture integrated into the space.

Everything in place, everything in harmony, a sense of life that flows through the space.

Hunting lodges - Hunting furniture

All hunting furniture has a message for its new owner, which only she or he can feel, that makes it truly her or his. It is the part of the hunter's personality that will never be reproduced anywhere in the world, it's like a fingerprint.

Oak is distinctive and noble. Once it's in expert hands, with fine detail, with careful shaping, it takes on a new form to serve its proud owner for a lifetime and bring enjoyment day after day.

Hunting lodges - Hunting furniture

Our hollow oak beams conceal the accessories for lighting and ventilation. Easy, retrofitting and it gives the space a homely feel.

The striking appearance, the functional beauty, the strength, durability and naturalness give complexity.
